Geoffrey Fox is a Distinguished Professor of Computer Science, Computer Science and Physics and Associate Director of Studies and Research in Computer Science at the University of Indiana. In 2004, he received the Outstanding Achievement Award from the China Computer Federation and the IEEE 2011 IPOPS Founders Award for his pioneering contributions in the field of parallel processing. Based on his contributions in the areas of supercomputing and high performance, he was elected a member of the National Academy of Engineering in the United States. He earned Ph.D. in EECs from UniversityÅ California at Berkeley. He has previously taught and led many research groups at Caltech and Syracuse University. Cloud computing principles are discussed using examples from open-source and commercial applications, along with case studies from major distributed computer vendors such as Amazon, Microsoft, and Google. On Google.
